

TT Laser Emission Module

Introduction

The TT laser emission module uses a 5mw small laser head, light in weight, safe and harmless. Its PH2.0 interface can be directly connected with the TT IO expansion board.

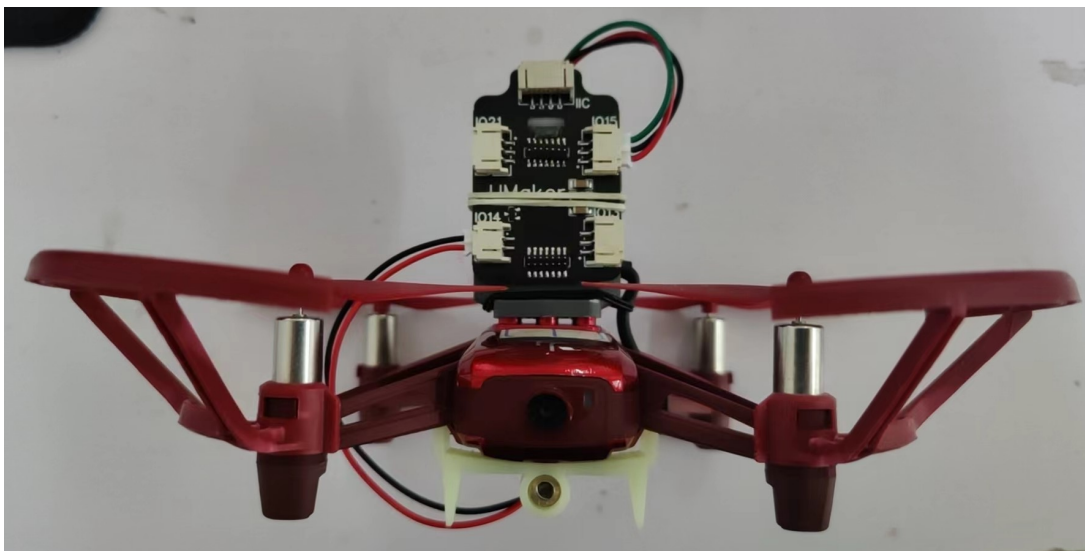

The light weight of this product does not affect the normal flight of the aircraft, and can be installed and disassembled without any tools.

Product specs

- Drive circuit: Mos circuit
- Power: 5MW
- Laser wavelength: 650nm
- Light source: Point-shaped light source
- Operating voltage: 5V
- interface: PH2.0-2P

Installation tutorial

Install by using the TT IO expansion board

Programming tutorial

Example 1

Click the open source controller button to emit a laser.
